

USMAN ASLAM

IT PROJECT MANAGER | BUSINESS ANALYST

Lahore, Punjab, Pakistan | +92 329 6300527 | usmankhan143011608@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

IT Project Manager and Business Analyst with 3+ years of experience delivering software and AI-driven platforms across field-force management, retail audit, ERP and CRM domains. Skilled in the full SDLC, Agile/Scrum delivery, backlog and sprint/release planning, roadmaps, risk register management, budget tracking and cost forecasting, and team-capacity planning. Proven record of leading distributed teams and C-level client engagements while maintaining strong stakeholder transparency and driving continuous improvement. Fluent in written and spoken English.

CORE COMPETENCIES

SDLC · Agile / Scrum · Sprint & Release Planning · Product Backlog Management · Roadmaps & Network Diagrams · Risk Identification & Risk Registers · Budget Tracking & Cost Forecasting · Team Capacity Planning · Stakeholder Communication Management · Requirements Gathering (BRD / FRD / SRS) · User Stories & Acceptance Criteria · Distributed Team Coordination · Process Improvement · UAT & QA Coordination · Jira · Confluence · Monday.com · CRM MAXOUT · Odoo ERP · MS Excel

PROFESSIONAL EXPERIENCE

Manager, System & Support / IT Project Manager & Business Analyst | [Radio Score](#)

January 2026 – Present · On-site, Lahore

- Managed end-to-end delivery of field-audit, attendance and KPI-dashboard modules, transferring client requirements into an estimable, prioritised product backlog and understandable project tasks.
- Prepared release and sprint plans, product roadmaps and delivery schedules, coordinating feature prioritisation across geographically distributed design, engineering and QA teams.
- Managed sprints and delivery workflows in Monday.com for task tracking, tracked issues and client requests through a JIRA ticketing system, and maintained all project and requirement documentation in Confluence.
- Identified project risks and maintained risk registers for field-force and mystery-shopper initiatives, monitoring and mitigating them throughout the delivery lifecycle.
- Tracked delivery budgets and forecast costs across multiple parallel initiatives, and controlled team capacity by planning around leave, holidays and availability.
- Owned stakeholder communications with strong transparency by running system walkthroughs, minutes of meeting and status updates for the SHISH 2026 Mystery Shopper proposal, Field Force Management solution and Shell AI Monitoring System.
- Authored FRDs, WBS and Software Requirements Specifications (including the AI Dress Code Compliance project), and drafted precise user stories and acceptance criteria for the Adam Haulage “Logs Summary” feature, Targets (Volume) KPI dashboard and attendance systems.
- Specified module logic for an automated attendance system with geo-location tracking and geofencing plus specialised compliance software, partnering with engineering and QA teams and leading client walkthroughs.
- Designed technical logic for the Radio Score Attendance Portal (per-employee shift timing, geo-location tracking, geofencing, leave workflows and admin hierarchies) and the AI-based QC module for the retail-audit platform.
- Presented strategic recommendations to C-level stakeholders at PMI Pakistan and other enterprise clients, positioning Radio Score as an AI and tech-solutions innovator.
- Drove continuous improvement, standardising audit one-pager templates and automated conversion pipelines that reduced manual touchpoints by 40%.

Business Analyst / Business Developer | [ASR BPO \(Official Odoo ERP Partner\)](#)

January 2025 – December 2025 · Lahore

- Elicited, analysed and documented business, functional and non-functional requirements through stakeholder interviews and workshops, applying Agile/Scrum throughout.
- Delivered Odoo ERP implementation support covering module analysis, configuration and workflow alignment, and produced process flows, wireframes and use cases.
- Supported UAT planning, defect tracking and requirement traceability, and performed data analysis, reporting and impact assessments for data-driven decisions.

Junior Business Analyst | [Techno Pulse](#)

June 2024 – December 2024 · Lahore

- Gathered and documented requirements via stakeholder interviews and workshops, maintaining product backlogs with user stories and acceptance criteria under Agile/Scrum.
- Built process flows, wireframes and use cases and collaborated with developers, QA and product owners to ensure on-time, high-quality delivery.

Game Mechanics Developer | [HR Games Studio](#)

January 2024 – June 2024 · Lahore

- Designed and implemented mobile game mechanics in C# / Unity, optimising performance and debugging gameplay for smooth, bug-free experiences across devices.
- Translated gameplay ideas into structured functional requirements, user flows and feature documentation for the Alpha Run 3D platformer and Bouncy 3D Ball physics application.

KEY PROJECTS

- **Radio Score – Field Force & AI Retail Audit Platform:** Drove end-to-end delivery of field-force management, mystery-shopper and AI retail-audit solutions across backlog, sprint planning, risk register and stakeholder reporting, then authoring the SRS for AI Dress Code Compliance and designing the Attendance Portal logic (geo-location, shift management, admin hierarchies). Led C-level presentations to PMI Pakistan and other enterprise clients.
- **PMI Pakistan – SHISH 2026 Mystery Shopper Proposal:** Owned end-to-end development of an enterprise-scale pitch covering 5,000–10,000 retail outlets across 16 Pakistani cities. Built the PowerPoint deck featuring AI QA modules (shop-facia matching, ZYN expiry OCR, CNIC verification, anomaly detection), field-force framework and app mockups; successfully communicated technical capability to stakeholder committees.
- **Adam Haulage – Fleet Management & Operations Dashboard:** Managed delivery as Project Manager for a PowerPoint one-pager and automated Excel-to-PPT reporting workflow integrating vehicle KPIs (utilisation, maintenance, fuel efficiency) with real-time productivity data across 50+ vehicles and multiple depots, cutting manual reporting time by 60%.
- **Shell – Sales Application (Project Manager):** Led delivery as Project Manager for the Shell Sales App, owning the product backlog, sprint and release planning, and stakeholder coordination across design, engineering and QA teams. Managed requirements, timelines and risk tracking through to rollout, keeping the field-sales workflows aligned with client business objectives.
- **Kaizen – Sales Application (Project Manager):** Managed end-to-end delivery of the Kaizen Sales App as Project Manager, translating client requirements into a prioritised backlog, coordinating sprint plans across a distributed team, and maintaining stakeholder reporting from planning through release.
- **UBL SME Digital Lending – Audit Compliance & Documentation:** Built a scalable PDF-generation pipeline (fixed layout template, wkhtmltopdf) converting multi-page field-audit reports into compliance-ready summaries, processing 100+ documents monthly and reducing processing time from 4 hours to 15 minutes per report.
- **Aramco COCO Petrol Stations – Interactive Mapping & Route Optimisation:** Developed a Leaflet.js web application for 100 COCO petrol stations with real-time routing, multi-stop itinerary optimisation and FROM/TO search, enabling Territory Managers to optimise daily routes and increase visit frequency.
- **Wafi Energy – CX-Pulse / TradeForce Shell Portal Access:** Managed credential provisioning and onboarding for Territory Managers across regional teams, compiling role-based access hierarchies and portal orientation guidelines and coordinating with IT and CRM teams for seamless activation.
- **Regional Operations Report Redesign – Sales Territory Management:** Redesigned the regional reporting framework with a multi-level drill-down grading system, corrected 40+ region-to-zone mapping inconsistencies, improved query response time by 50% and enabled cross-regional benchmarking.
- **UBL Delivery Coverage Map – Zone-Based Pricing Model:** Created a 3-zone delivery pricing map with an Excel profitability model and stakeholder documentation, used as a reference tool for sales pricing negotiations and territory assignment.
- **Field Operations – Supervisor Performance Validation Framework:** Built a PowerPoint strategy deck plus Excel scoring model assessing supervisor competency across execution, compliance and team management, adopted across multiple field teams for quarterly reviews.
- **Afghanistan Retail Market Research – Tobacco Product Survey:** Delivered a market-research deck (category analysis, consumer segmentation, competitive landscape, market sizing) that served as a strategic reference for regional product-portfolio and market-entry decisions.
- **Chrome Extension Development – Data Scraping Tools:** Developed Chrome extensions for automated data collection from Google Maps and Search, exporting structured CSV for competitive intelligence and reducing manual data entry by 70%.
- **CRM MAXOUT:** Served as Business Analyst to streamline customer-relationship-management processes, documenting end-to-end workflows to improve lead management and client engagement and aligning the CRM system with organisational goals.
- **LinkedIn Professional Branding & Content Strategy:** Redesigned personal and corporate LinkedIn presence to establish thought leadership in the AI and tech-solutions space, running an ongoing post series on Radio Score capabilities and project outcomes that increased connection requests by 45% and attracted inbound recruitment interest.
- **E-File / E-Workforce Payroll & Accountant Blue Book (ABB):** Led documentation for automated payroll systems (WBS, FRDs, tax-calculation and employee-data logic) and managed the full documentation lifecycle for the ABB accounting software, including user manuals and technical guides.

EDUCATION

Bachelor of Gaming & Multimedia | Superior University (Gold Campus) 2021 – 2025

Intermediate | Superior Group of Colleges, Manawa Campus, Lahore 2018 – 2020

Matriculation | New English Secondary High School, Lahore 2016 – 2018
